Healthy choice

Chic, contemporary looks and eco-friendly principles are combined in kitchens from Blue Plum Design

Above: This Blue Plum Design kitchen, which meets eco-friendly manufacturing and finishing standards, is owned by architect Carolyn Walker-Davis. The kitchen features CaesarStone countertops in a Baja color, and these are teamed with cabinetry finished in a water-based charcoal-colored lacquer.

Kitchens of any style or design can be healthy – and good for the environment – if they are built using eco-friendly materials and methods.

Scott Martin of Blue Plum Design says that, from an architectural viewpoint, green cabinetry is not a design style.

“Rather, a green kitchen is the result of the material selection. You can have a high-styled

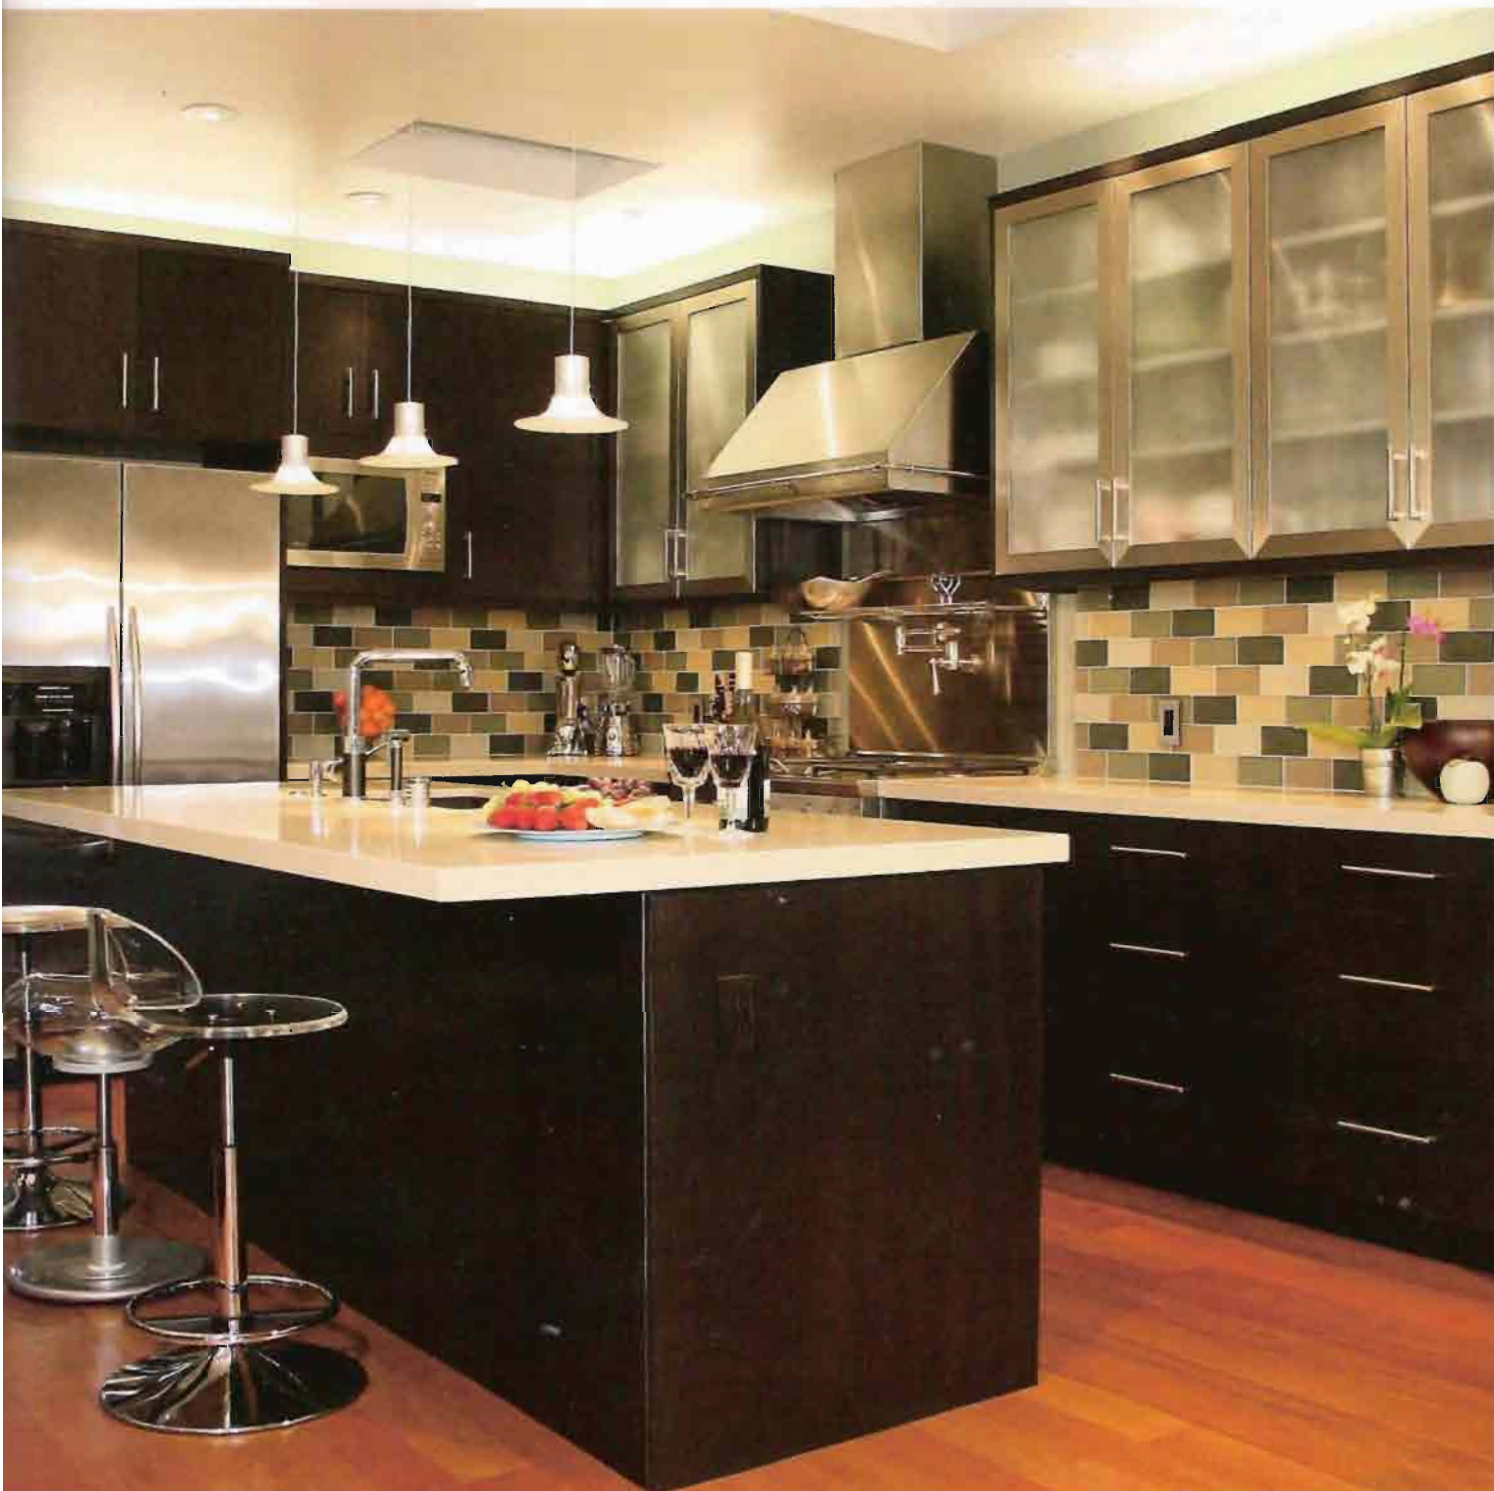

kitchen that is also healthy for you and the environment. The two concepts are not mutually exclusive,” he says.

Any design is possible, and the kitchen featured here is a good example of modern green cabinetry, says Martin.

The cabinets were made from materials that do not give off toxic levels of formaldehyde or volatile organic compounds (VOCs).

Instead, Blue Plum Design uses case material that is SCS- and EPP-certified to be 100% pre-consumer recycled wood fiber particleboard and has no urea formaldehyde added during the manufacturing process, and uses only water-based stains and finishes.

Kitchens from Blue Plum Design combine products with low emission standards,

certified recycled content and sustainable raw materials.

"In addition to being healthy, these green kitchens can also be affordable," says Martin.

For details, contact Blue Plum Design, 41 Arkansas St, San Francisco, CA 94107, phone (415) 341 8727, fax (415) 341 8738. Email: scott@blueplumdesign.com. Website: www.blueplumdesign.com.

Above: Brushed stainless steel doors and textured glass panels on upper level cabinetry bring light into this Blue Plum Design kitchen.

Left: This kitchen is a good example of a space that is healthy for its owners and for the environment, and at the same time is contemporary and stylish.
