\$4.50 U.S.

This multipurpose area wraps four distinct personalities into one fluid space. The family/living area, defined by furniture placement and an area rug, occupies center stage. A dining area, music room, and library complete the ensemble.

#### *What keeps it together:*

- An open line of sight is maintained throughout much of the area.
- Flooring and wall colors are consistent.
- An expansive entrance to the library area creates more openness than a standard doorway would.

#### *What sets it apart:*

- Furniture provides a simple but clear definition of the seating area.
- A lowered ceiling adds focus to the library niche.
- The music room features an elevated floor level and retractable curtain for privacy.
